

Cullinos QA — What's New for Testers

Cycle: 2026-09 (share with the latest QA pack)
Case count: **190** test cases (was 160)

Read this before Day 1. Full click-by-click steps: [COMPLETE_FEATURE_TEST_GUIDE.md](#). Day plan: [TESTER_HANDBOOK.md](#).

Production apps (updated)

App	URL	Notes
POS	https://pos.cullinos.com	Hosted — not local-only
KDS	https://kds.cullinos.com	Hosted — not local-only
Admin Portal POS	https://admin.cullinos.com/pos	In-admin counter POS (permission <code>POS_ACCESS</code>)
Displays hub	Admin → <code>/displays</code>	Single hub for KDS / CDS / Pickup / Promo URLs. Legacy <code>/kds</code> , <code>/cds</code> , <code>/promo-display</code> , <code>/pickup-queue</code> redirect here
Cullinos App	Deep link <code>guest.cullinos.com/o/{org}/{outlet}</code> + Android	Replaces customer web
Waiter	Cullinos Waiter Android	Replaces waiter web

Local POS/KDS remains an optional fallback only.

New or upgraded features to test

Admin (owner)

Feature	Path	What changed
Tables	/tables	Real create/edit UI (no longer a placeholder)
Reservations	/reservations	Bookings + public book-link
Inventory	/inventory	Real stock UI (no longer a placeholder)
Recipes	/recipes	Full recipes UI
Purchasing / Suppliers	/purchasing , /suppliers	POs, GRN, supplier directory
Central kitchen	/central-kitchen	Indents / fulfillment (multi-outlet)
Loyalty	/loyalty	Dedicated loyalty page
Delivery	/delivery	Delivery orders UI
Aggregators	/aggregators	Swiggy / Zomato connect & settlements
Payments	/payments	Tenant Razorpay / Cashfree keys
SMS campaigns	/sms-campaigns	MSG91 marketing SMS
Cullinos App	/marketplace , /guest-banners , /coupons	Listing, banners, offers
Displays	/displays	Unified launcher + promo slides
Billing	/billing	Subscription / billing page
Digital Ordering	/kiosk	Kiosk / storefront launcher
Portal POS	/pos	Hold / resume / checkout in Admin
Settings	/settings	Form UI (restaurant details, order types, locations, tax, devices) — not a JSON editor
Forgot / Change password	/forgot-password , /change-password	Auth recovery flows

Removed from Admin: Promo Email and Guest Push pages are **not** routed in Admin. Use:

- Promo Email → Super Admin /promo-email
- Guest push → Super Admin /guest-ops/push

No “Demo data” button. Sample menu categories are seeded only when the owner clicks **Complete setup** on onboarding.

Business-type gated (often N/A on restaurant tenant)

Feature	Path	Visible when
Banquets	/banquets	Banquet / events business type
Brands	/brands	Cloud kitchen / multi-brand
Guests	/hospitality/guests	Hotel / room service
Rooms	/hospitality/rooms	Hotel / room service
Central kitchen	/central-kitchen	Multi-outlet / central kitchen plans

Primary QA tenant: **enterprise** + **restaurant** (medium or large size so Tables, KDS, Inventory, Loyalty, Recipes, Delivery appear). Mark gated pages **N/A** unless you create a second tenant of that type.

Cullinos App (Guest)

- Phone OTP / PIN / Google auth, marketplace Discover / Explore / Offers / Profile
- Outlet order, cart, checkout, kiosk (pay at counter)
- Deep links: <https://guest.cullinos.com/o/{org}/{outlet}>
- See [apps/guest/README.md](#) and Complete Feature Test Guide chapter 10

Super Admin

Feature	Path
Plans	/plans
Guest App Ops	/guest-ops (marketplace, discover, banners, push, offers, reviews, users, analytics, runtime)
Promo Email	/promo-email
Testimonials editor	/marketing/testimonials
Design Lab	/marketing/design-lab
Settings	/settings
Forgot password	/forgot-password
Impersonation	Tenants → Open as tenant

Known limitations (updated)

Still expected	Not a bug anymore
Razorpay pay-now without keys → N/A	Admin Tables placeholder
Outlet comparison needs 2+ outlets	Admin Inventory placeholder
Banquets / Brands / Guests / Rooms hidden on restaurant → N/A	POS/KDS "local only"
Aggregator menu sync may be partial	Settings as JSON editor
Admin <code>/promo-email</code> 404	Expected — use Super Admin

Product docs for context

- **Complete Feature Test Guide:** [COMPLETE_FEATURE_TEST_GUIDE.md](#)

- Architecture: [../ARCHITECTURE.md](#)

Share pack

Regenerate Excel/PDF after markdown changes:

```
npm run qa:export
```

Then share `export/pdf/` + `export/excel/` with testers. Case count in Excel should match **190** after regenerate.
