

PRODUCT OVERVIEW

What Cullinos is — and everything we offer

A complete guide to the Cullinos Restaurant Operating System: apps, features, verticals, and plans.

Cullinos

Restaurant Operating System · by Rkyves
For decision makers · cullinos.com

THE PRODUCT

Cullinos is your food business OS

Cullinos is a multi-app platform from Rkyves. One backend powers POS, kitchen displays, waiter floor service, guest QR/online ordering, owner Admin, and multi-outlet Management — so every role works from the same live data.

“One login for cashier, kitchen, online orders, production, and reports.”

GST + offline capability built in. Scales from a single counter to hotel and franchise networks.

The Cullinos apps

App	Who uses it	What it does
Admin admin.cullinos.com	Owner / manager	Menu, staff, inventory, recipes, loyalty, delivery, reports, billing, launchers, Portal POS
POS pos.cullinos.com	Cashier	Counter & takeaway billing, holds, GST receipts, payments
KDS kds.cullinos.com	Kitchen	Live kitchen tickets; Order Display (preparing / ready) mode
Waiter waiter.cullinos.com	Floor staff	Table map, table-side orders, QR guest sessions
Customer order.cullinos.com	Guests	QR dine-in & online storefront (guest checkout; optional login)
Management manage.cullinos.com	Multi-outlet ops	Network KPIs, outlet comparison, stock transfer, franchise

Feature catalogue

Front of house

Point of Sale

Fast checkout, modifiers, holds, takeaway, GST-compliant receipts.

Portal POS

Full cashier experience inside Admin for QSR / counter teams.

Waiter app

Mobile table-side ordering and live table status.

Table management

Create tables, capacities, and floor visibility in Admin.

Kitchen Display (KDS)

Route KOTs, track prep, mark items ready.

Order Display (CDS)

Customer-facing preparing / ready board for pickup counters.

Customer channels

QR dine-in ordering

Guests scan a table session QR and order into the same ticket.

Online storefront

Branded ordering link for pickup and delivery.

Digital Ordering / kiosk

Admin launcher for kiosk and storefront URLs.

Customer login

Optional account login without blocking guest checkout.

Back office

Menu management

Categories, items, pricing, availability, modifiers.

Inventory

Stock levels, adjustments, and outlet stock visibility.

Recipes & costing

Link ingredients to dishes for production and cost control.

Production & batches

Schedule and complete production batches.

Staff & permissions

Roles (owner, waiter, cashier, ...) with route-level access.

Reports & analytics

Revenue, top items, and outlet performance.

Billing & GST

Tax-ready bills and subscription billing page.

Settings & onboarding

Business type wizard, GSTIN, order types, org config.

Growth & engagement

CRM / Customers

Customer profiles, tiers, and coupon visibility.

Loyalty

Stamp cards, points, and rewards programs.

Promo Email

Compose and send promotional campaigns to guests.

Delivery

Track and manage delivery orders from Admin.

Events

Schedule pop-ups and event-driven pre-orders.

Coupons

Discount codes applied at customer checkout.

Enterprise & hospitality

Multi-outlet management

Consolidated KPIs and outlet comparison.

Stock transfer

Move inventory between outlets.

Multi-brand

Cloud kitchen / brand catalogue support.

Franchise tools

Franchisee visibility for chain operators.

Banquets

Banquet and large-event workflows.

Guests & Rooms

Hospitality guest profiles and room service posting.
