Cullinos QA — Quick Reference Card

Print this page and keep it at your desk.

Production portals

App	URL
Super Admin	https://platform.cullinos.com
Admin	https://admin.cullinos.com
Portal POS	https://admin.cullinos.com/pos
Management	https://manage.cullinos.com
Waiter	Cullinos Waiter Android app
POS	https://pos.cullinos.com
KDS	https://kds.cullinos.com
Cullinos App	https://guest.cullinos.com/{orgSlug}/{outletSlug}
Marketing	https://cullinos.com
Swagger	https://api.cullinos.com/docs
Health	https://api.cullinos.com/api/v1/health

4-day test order

Day	Focus
1	Preflight + onboard + menu + tables + Waiter + Cashier
2	Waiter + POS + KDS + guest checkout + CDS + Portal POS
3	Admin modules (new pages) + Management + Super Admin
4	Marketing site + Swagger API

Minimum test flow

1. Super Admin → **Onboard restaurant** (enterprise plan)
2. Admin → **Menu** + **Tables** + **Staff** (Waiter + Cashier)
3. Waiter → **Table order** → KDS verifies KOT
4. POS / Portal POS → hold / resume / checkout
5. Customer → **Checkout** in incognito (verify)
6. TEST_RUN_SHEET → mark all **232 cases**

Result codes

Code	Meaning
Pass	Works as expected
Fail	Bug — log in BUG_LOG.xlsx + screenshot
Blocked	Cannot test (missing access/tools)
N/A	Not applicable

Rules

- **Never** put real passwords in Excel or email
- Use **Incognito** for guest customer tests
- **QA tenant only** for suspend/reactivate tests
- Banquets / Brands / Guests / Rooms on restaurant → usually **N/A**
- POS/KDS: use production URLs first

Files to return

- TEST_RUN_SHEET.xlsx (all 232 rows filled)
- BUG_LOG.xlsx (one row per failure)
- CREDENTIALS_LOG.xlsx (no passwords)
- evidence/ folder (screenshots)
