Cullinos QA — What's New for Testers

Cycle: 2026-09 (share with the latest QA pack)
Case count: 232 test cases (was 190) — new: web kiosk (2.8), token ordering (2.9), table system / UrbanPiper / Online panel / customer merge (TC-3-46..57), platform employees / approvals / people (TC-5-31..37), Support portal (Phase 8), App Ops (Phase 9)

Read this before Day 1. Full click-by-click steps: **COMPLETE_FEATURE_TEST_GUIDE.md**. Day plan: TESTER_HANDBOOK.md.

Production apps (updated)

App	URL	Notes
POS	https://pos.cullinos.com	**Hosted** — not local-only
KDS	https://kds.cullinos.com	**Hosted** — not local-only
Admin Portal POS	https://admin.cullinos.com/pos	In-admin counter POS (permission `POS_ACCESS`)
Displays hub	Admin → `/displays`	Single hub for KDS / CDS / Pickup / Promo URLs. Legacy `/kds`, `/cds`, `/promo-display`, `/pickup-queue` **redirect here**
Cullinos App	Deep link `guest.cullinos.com/o/{org}/{outlet}` + Android	Replaces customer web
Waiter	Cullinos Waiter Android	Replaces waiter web

Local POS/KDS remains an optional fallback only.

New or upgraded features to test

Admin (owner)

Feature	Path	What changed
Tables	`/tables`	Real create/edit UI (no longer a placeholder)
Reservations	`/reservations`	Bookings + public book-link
Inventory	`/inventory`	Real stock UI (no longer a placeholder)
Recipes	`/recipes`	Full recipes UI
Purchasing / Suppliers	`/purchasing`, `/suppliers`	POs, GRN, supplier directory
Central kitchen	`/central-kitchen`	Indents / fulfillment (multi-outlet)
Loyalty	`/loyalty`	Dedicated loyalty page
Delivery	`/delivery`	Delivery orders UI
Swiggy & Zomato	`/aggregators`	UrbanPiper connect (sandbox/production), webhook URLs + secret, per-outlet store link, menu push, store pause, per-outlet item stock, unknown-item linking, settlement CSV import
Payments	`/payments`	Tenant Razorpay / Cashfree keys
SMS campaigns	`/sms-campaigns`	MSG91 marketing SMS
Cullinos App	`/marketplace`, `/guest-banners`, `/coupons`	Listing, banners, offers
Displays	`/displays`	Unified launcher + promo slides
Billing	`/billing`	Subscription / billing page
Digital Ordering	`/kiosk`	Kiosk / storefront launcher
Portal POS	`/pos`	Hold / resume / checkout in Admin. Start typing anywhere to search (no `/` needed); Hold is now **Alt+H**. **Online** panel shows Swiggy/Zomato orders with chime, accept timer, Accept (prep time) / Reject (reason) / Food ready / Handed to rider, KOT prints on accept
Settings	`/settings`	**Form UI** (restaurant details, order types, locations, tax, devices) — **not** a JSON editor
Table system (per outlet)	`/settings` → General → **Table system**	Toggle "Use tables at this outlet" for any business category; "Use category default" resets it. **Off:** Tables / Reservations disappear from nav for that outlet, a **Counter QR** card appears (also on `/kiosk`), table QR links show the counter flow, new table sessions are rejected. **On** (e.g. QSR): Tables nav appears (needs the Tables plan module) and table QR sessions work
Token ordering	Counter QR → guest web	Guest picks Eat in / Takeaway, places order, sees **Your token** (pickup code) + order number. KDS ticket shows **Token XXXXXX** for orders without a table; pickup / CDS display lists the same code
Forgot / Change password	`/forgot-password`, `/change-password`	Auth recovery flows

Removed from Admin: Promo Email and Guest Push pages are **not** routed in Admin. Use:

- Promo Email → Super Admin `/promo-email`
- Guest push → Super Admin `/guest-ops/push`

No "Demo data" button. Sample menu categories are seeded only when the owner clicks **Complete setup** on onboarding.

Business-type gated (often N/A on restaurant tenant)

Feature	Path	Visible when
Banquets	`/banquets`	Banquet / events business type
Brands	`/brands`	Cloud kitchen / multi-brand
Guests	`/hospitality/guests`	Hotel / room service
Rooms	`/hospitality/rooms`	Hotel / room service
Central kitchen	`/central-kitchen`	Multi-outlet / central kitchen plans

Primary QA tenant: **enterprise** + **restaurant** (medium or large size so Tables, KDS, Inventory, Loyalty, Recipes, Delivery appear). Mark gated pages **N/A** unless you create a second tenant of that type.

Cullinos App (Guest)

- Phone OTP / PIN / Google auth, marketplace Discover / Explore / Offers / Profile
- Outlet order, cart, checkout, kiosk (pay at counter)
- Deep links: `https://guest.cullinos.com/o/{org}/{outlet}`
- See `apps/guest/README.md` and Complete Feature Test Guide chapter 10

Super Admin

Feature	Path
Plans	`/plans`
Guest App Ops	`/guest-ops` (marketplace, discover, banners, push, offers, reviews, users, analytics, runtime)
Promo Email	`/promo-email`
Testimonials editor	`/marketing/testimonials`
Design Lab	`/marketing/design-lab`
Settings	`/settings`
Forgot password	`/forgot-password`
Impersonation	Tenants → **Open as tenant**

Known limitations (updated)

Still expected	Not a bug anymore
Razorpay pay-now without keys → **N/A**	Admin Tables placeholder
Outlet comparison needs 2+ outlets	Admin Inventory placeholder
Banquets / Brands / Guests / Rooms hidden on restaurant → **N/A**	POS/KDS “local only”
Swiggy/Zomato needs an UrbanPiper account; without it, test on UrbanPiper sandbox or mark **N/A**	Settings as JSON editor
Direct Swiggy/Zomato webhook menu sync is rejected (use UrbanPiper menu push)	Aggregators "Coming soon" page
Admin `/promo-email` 404	Expected — use Super Admin

Product docs for context

- **Complete Feature Test Guide:** COMPLETE_FEATURE_TEST_GUIDE.md

Share pack

Regenerate Excel/PDF after markdown changes:

```
npm run qa:export
```

Then share `export/pdf/` + `export/excel/` with testers. Case count in Excel should match **232** after regenerate.
