AGENCY & CREATOR BRIEF

Everything you need to tell the Cullinos story

What Cullinos is, every feature in plain language, who it is for, how to talk about it, content ideas, and the claims to avoid.

Cullinos

Restaurant Operating System · by Rkyves
For marketing agencies & content creators · cullinos.com · 2026

1 · CULLINOS IN ONE PAGE

Your food business operating system

One login runs the cashier, kitchen, QR & online orders, the Cullinos Guest marketplace app, production, and reports — for restaurants, cafes, food trucks, bakeries, cloud kitchens, bars, and hotels. GST billing built in. Made in Mumbai by **Rkyves**.

GST-READY

India billing built in

CGST, SGST, and IGST on every bill — not bolted on later.

EVERY CHANNEL

One kitchen

POS, waiter, QR, storefront, kiosk, Guest app, Swiggy & Zomato — all on one kitchen screen.

SCALES

Truck to hotel chain

The same platform from a single counter to a multi-outlet hotel group.

The one-line pitch

Stop juggling five apps to run one restaurant. Cullinos runs billing, kitchen, orders, stock, and marketing as one live system.

2 · The problem we solve

A typical Indian restaurant runs on a patchwork: a basic billing machine, paper kitchen tickets that get lost, separate Swiggy and Zomato tablets, Excel for stock, WhatsApp groups for staff, and nothing (or another tool) for loyalty and customer data. Every tool has its own menu, prices, and login — and nothing talks to anything else.

Cullinos replaces the patchwork with one live system. Change a price once and it updates on the POS, QR menu, kiosk, and Guest app. An order from any channel appears on the kitchen screen instantly. Sales, stock, and customers live in one dashboard.

3 · How it works

1. ### Set up your outlet
   Add your menu, tables, staff, and GST settings in the Admin dashboard.

2. ### Take orders anywhere
   POS, waiter app, table QR, online storefront, kiosk, or the Guest app — all connected.

3. ### The kitchen stays in sync
   Orders appear on the Kitchen Display instantly — from floor, web, app, or aggregators.

4

Track and grow

See sales, inventory, customers, and reports. Add outlets when you are ready.

- Cashier POS
- Waiter app
- Table QR
- Online storefront & kiosk
- Cullinos Guest app
- Swiggy & Zomato

→ **Kitchen Display** → **One GST-ready ledger & reports**

4 · The apps, explained like a person would use them

Each role gets its own focused app. They all share the same live data.

App	Who uses it	What it does	A moment you can film
POS browser + Windows	Cashier	Touch billing, modifiers, hold / resume, takeaway, cash & online payments, GST receipts	Cashier clears a lunch rush in seconds; receipt prints instantly
Portal POS	Counter teams	Full cashier screen inside Admin — no separate device needed	Owner billing from the same laptop they manage the menu on
Kitchen Display	Kitchen	Live tickets routed to stations; tap to mark ready	New order pops onto the kitchen screen the moment a guest orders
Order Display	Guests at the counter	Preparing → Ready board	Order number flips to Ready on a TV
Promo display	Guests in venue	Promo playlists on TV or tablet	In-store TV cycling today's specials
Waiter app Android	Floor staff	Table map, table-side orders, QR sessions	Kitchen updates before the waiter walks away
Admin	Owner / manager	Menu, staff, stock, purchasing, CRM, loyalty, reports, Guest app listing & banners	Change a price once; it updates everywhere
Management	Chains	Network KPIs, outlet comparison, stock transfer, franchise	Three outlets' sales side by side
Cullinos Guest app Android	Diners	Discover nearby outlets, order, reorder, loyalty, push updates	Diner finds a cafe, orders, gets "Your order is ready"
Storefront & table QR guest.cullinos.com	Diners	Branded web menu; scan table QR to order into the bill	Guest scans, orders, food arrives — no waving for a waiter

5 · Full feature tour

Everything below is live today. Each line gives what it is and why a restaurant cares.

Front of house

Feature	What it is	Why it matters
Point of Sale	Touch checkout, modifiers, holds, takeaway, discounts, split bills, GST receipts	Faster billing, compliant invoices
Cashier shifts	Open / close shifts with cash-drawer accountability	Know who handled the cash
Waiter app	Mobile table-side ordering, live status	Fewer trips, fewer wrong orders
Table management	Table map, merge / transfer, service requests	Smooth turnover on busy nights
Table sessions & QR	Guests scan and add to the same table bill	Guests order more, staff run less
Reservations	Admin bookings plus a public booking link	Share the link on Instagram or Google
Kitchen Display & KOT	Live tickets on screen or printed, station routing	No lost paper tickets
Order Display	Preparing → Ready board	Less crowding at the counter
Promo display	Promo playlists on in-venue screens	Idle screens become upsell screens
Pickup queue	Ready-queue workflow for counters	Fast-food style flow

Customer ordering channels

Feature	What it is	Why it matters
QR dine-in ordering	Scan the table QR and order into the table session	Self-service, no app download
Online storefront	Branded menu and ordering link per outlet	Direct orders the restaurant owns
Digital ordering / kiosk	Self-serve kiosk mode	Shorter queues
Guest checkout & OTP login	Order with name + phone; optional phone-OTP login	No friction for first-timers
Loyalty portal	Loyalty status on the storefront	Brings guests back
Deep links	Links that open a specific outlet in the app or web	Perfect for bios, posts, and ads

Cullinos Guest app (for diners)

Feature	What it is
Nearby marketplace	Discover restaurants near you
Browse & order	Menus, cart, dine-in / takeaway / delivery
Easy login	Phone OTP, optional PIN
Orders & reorder	History and one-tap reorder
Favourites, reviews, addresses	Save outlets, leave reviews, faster delivery checkout
Loyalty wallets	Points and stamps in the app
Push notifications	Order status plus offers and campaigns
Coupons, Discover & banners	Offer codes, curated home rows, outlet banners

Back office

Feature	What it is	Why it matters
Menu management	Categories, items, modifiers, pricing, availability	One menu, updated everywhere
Happy hours	Time-based pricing	Price changes run automatically
Inventory	Stock levels and adjustments per outlet	Know what is running low
Recipes & costing	Ingredients linked to dishes	True cost and margin per plate
Purchasing, POs & suppliers	Purchase orders, goods receipt, vendor list	Track ordered vs. received
Wastage	Log waste against stock	See where money is lost
Production & central kitchen	Batches, plus outlet requests fulfilled by a central kitchen	Bakeries and hub-and-spoke kitchens
Brands	Multiple brands from one kitchen	Built for cloud kitchens
Staff & roles	Owner, manager, cashier, waiter, kitchen, and more	Staff see only what they need
Devices & printing	Receipt and KOT print setup	Thermal printers, cash drawers
Reports & day-book export	Sales, top items, outlet performance, accounting export	Real numbers, easy accountant hand-off

Orders & payments

Feature	What it is
Unified orders	Every channel in one list: create, hold, resume, cancel
Discounts & split bills	Item or bill discounts; split between guests
Payments	Cash plus online payments via the restaurant's own Razorpay or Cashfree account
Refunds	Cancelled paid orders refund through the gateway where possible; otherwise staff confirm on the gateway dashboard
GST tax engine	Automatic CGST / SGST / IGST calculation
Delivery & aggregators	Track delivery; Swiggy and Zomato orders flow in with settlement tracking
Feedback surveys	Post-order survey links

CRM & growth

Feature	What it is	Why it matters
Customer CRM	Profiles, history, tiers	Know your regulars
Loyalty	Stamps, points, rewards	Turn first-timers into regulars
Coupons	Discount codes across channels	Run offers anywhere
SMS campaigns	MSG91 marketing SMS from a prepaid wallet	Reach customers directly
WhatsApp e-bills	Bills on WhatsApp, pay-per-message	Paperless receipts, direct touchpoint
Events & pop-ups	Pre-orders for events	Pop-ups, catering, festivals
Privacy & consent	Consent, data export and erase	Built with India's DPDP law in mind

Enterprise & hospitality

Feature	What it is
Multi-outlet console	Network KPIs and outlet comparison
Stock transfer	Move inventory between outlets
Franchise & multi-brand	Franchisee visibility; multiple brands from shared kitchens
Advanced analytics & API	Network dashboards, exports, and integrations
Room service & room posting	In-room dining charged to the guest's room bill
Banquets	Menus, packages, and billing for large events

Restaurants control their Guest app listing and banners from Admin. Featured placement, Discover curation, and app-wide push campaigns are run by the Rkyves team.

Bars & pubs

An automatic Bar station on the kitchen display, happy-hour pricing, pour-size recipes tracked against bottle stock, a liquor stock register with CSV export, and a State Excise tax group.

6 · Who it's for

Vertical	The story to tell
Restaurants	Tables, waiter app, QR dine-in, kitchen display, full back office
Cafes & QSR	Lightning-fast counter billing, Ready board, loyalty, kiosk
Food trucks & pop-ups	POS on a tablet, events and pre-orders, quick service
Bakeries	Production batches, recipes, pre-orders
Cloud kitchens	Multiple brands, delivery, Swiggy / Zomato on one kitchen screen
Catering	Events, pre-orders, production planning
Bars & pubs	Happy hours, bar station, pour-size stock, liquor register
Hotels & resorts	Room service, charge-to-room, banquets

Personas

Persona	What they worry about	What to show them
Owner (single outlet)	Cash leakage, wrong orders, too many apps	One dashboard, shift cash control, kitchen screen, GST bills
Manager	Rush hours, staff mistakes, stock-outs	Waiter app, KDS, inventory, reports
Chain / franchise operator	Consistency and visibility across outlets	Management console, comparison, stock transfer, central kitchen
Hotel F&B head	Room service and banquet billing mess	Room posting, banquets, one platform
Diner	Waiting, waving for the waiter, repeat orders	QR ordering, Guest app, reorder, loyalty

7 · Plans & pricing

STARTER

₹1,499 / month

POS, KDS, tables, QR & online ordering, reports

QSR / FOOD SMB

₹2,499 / month

Counter mode, pickup queue, loyalty, inventory, production

PROFESSIONAL

MOST POPULAR

₹4,999 / month

Full ops — inventory, CRM, delivery, Waiter app, up to 3 outlets

ENTERPRISE

Contact us

Custom pricing based on outlets, POS terminals, users, integrations and requirements.

HOSPITALITY

Contact us

Custom pricing based on rooms, outlets, terminals and integrations.

Prices in INR. Taxes as applicable. Yearly billing available. Custom quotes for special requirements.

8 · Integrations

Integration	What it does
Razorpay / Cashfree	Online payments (UPI, cards, wallets) into the restaurant's own account
MSG91	Phone OTP, marketing SMS, WhatsApp messages
Firebase	Guest app login and push notifications
Swiggy / Zomato	Incoming aggregator orders and settlements
Printers & hardware	Receipt and kitchen printers, cash drawers, scanners, display boards via the Local Gateway
Accounting	Daily day-book export

9 · Brand messaging kit

Positioning statement

For Indian food businesses tired of juggling separate billing, kitchen, delivery, and marketing tools, **Cullinos** is the restaurant operating system that runs every role and every order channel on one live platform, with GST billing built in. Unlike a basic POS, Cullinos connects cashier, kitchen, floor, guests, and owner — from one outlet to a hotel chain.

Key messages

1. **One system, every service moment.** Billing, kitchen, floor, online, and back office, connected.
2. **Every order reaches one kitchen.** POS, waiter, QR, app, and aggregator orders on the same screen.
3. **Built for India.** GST invoices, UPI payments, SMS and WhatsApp, phone OTP.
4. **Each role gets its own app.** Cashier, chef, and waiter each see only what they need.
5. **Grows with you.** From a food truck to a franchise network, on the same platform.

Tagline options

Your food business operating system.

One system. Every service moment.

Every order channel. One kitchen.

From one outlet to hotel chains — same platform.

Tone of voice

- **Confident, practical, warm** — like an experienced restaurant manager, not a software salesperson.
- **Show the moment, not the module** — "the grill sees the order the second it's placed", not "KDS with station routing".
- **India-first** — rupee prices, UPI, GST, lunch-rush and chai-break examples.
- **Plain language** — explain jargon (see the glossary) or avoid it.

Names to use exactly

Use	Avoid
Cullinos	Culinos, CullinOS, "Cullinos POS" (it is more than a POS)
Cullinos Guest app (or "the Cullinos app" for diners)	"Customer app", "Cullinos delivery app"
Cullinos Waiter app	"Captain app"
Rkyves (the company)	Rkyves POS, Rkives
Kitchen Display (KDS)	"Kitchen TV"

10 · Content ideas

Reel & short-video hooks

Feature	Hook idea
QR ordering + KDS	"QR to kitchen in 10 seconds" — split screen: guest scans, kitchen screen lights up
POS	"Lunch rush, zero panic"
Waiter app	"Your waiter just stopped walking to the counter"
Kitchen Display	"RIP paper KOTs"
Order Display	"No more 'is my order ready?'"
Menu sync	"Change the price once. Watch it update everywhere."
Recipes & costing	"Do you actually know what your paneer tikka costs you?"
Shifts & cash	"Who closed the drawer ₹500 short?"
Loyalty	"Turn first-timers into regulars"
WhatsApp e-bills	"Your bill, on WhatsApp, before you leave the table"
Aggregators	"Swiggy, Zomato, dine-in — one kitchen screen"
Guest app	"Found it, ordered it, picked it up"
Multi-outlet	"Three outlets. One screen. Morning chai."
Bars	"Happy hour starts itself"
Hotels	"Room 304 ordered biryani — and it's already on their bill"

Series ideas

- **A day in the life** — follow one order from QR scan to kitchen, Ready board, bill, and the owner's report.
- **Before / after Cullinos** — paper tickets and five tablets compared with one system.
- **Owner confessions** — real pain points (cash leakage, wrong orders, stock-outs), each answered by one feature.
- **One feature, 30 seconds** — a quick explainer per feature in section 5.
- **Vertical spotlights** — cafes, bakeries, cloud kitchens, bars, hotels.

60-second demo script

Time	Visual	Voiceover
0–5s	Messy counter: paper KOTs, three delivery tablets, a calculator	"Running a restaurant shouldn't need five apps."
5–15s	Guest scans the table QR and orders	"Your guests order straight from the table…"
15–25s	Order pops up on the kitchen screen; chef taps Ready	"…and the kitchen sees it instantly. No paper, no shouting."
25–35s	Waiter adds dessert; cashier bills; GST receipt prints	"Waiters, cashiers, and the kitchen all work from the same live order."
35–45s	Owner on Admin: sales, stock, top dishes	"You see sales, stock, and best sellers in one dashboard."
45–55s	Cuts: Guest app, loyalty, WhatsApp bill, multi-outlet view	"Loyalty, WhatsApp bills, your own ordering app, every outlet in one view."
55–60s	Cullinos logo + cullinos.com	"Cullinos. Your food business operating system."

Carousel / post ideas

- "5 signs your restaurant has outgrown its billing software"
- "What happens to an order in Cullinos" (step-by-step)
- "GST billing without the headache"
- "Which Cullinos plan fits you?"
- "The real cost of a dish" (recipe costing explainer)
- Customer story template (only with written permission from the restaurant)

Campaign themes by vertical

Vertical	Campaign theme
Cafes & QSR	"Faster queues, happier regulars"
Restaurants	"Run the floor, not the paperwork"
Cloud kitchens	"Many brands, one kitchen screen"
Bakeries	"Bake to plan, not to guess"
Bars & pubs	"Happy hours that run themselves"
Hotels	"Every outlet, every room, one system"
Chains	"Every outlet, one morning check"

12 · Do's and don'ts

Do

- Show real service moments (rush hour, table QR, kitchen screen) rather than abstract dashboards.
- Say "GST-ready billing with CGST, SGST, and IGST".
- Say Swiggy and Zomato orders **come into** Cullinos alongside your own orders.
- Mention that the Guest app is on **Android**.
- Send any new claim, statistic, or customer quote to Rkyves for approval before publishing.

Don't

Don't say	Why	Say instead
"Sync your menu to Swiggy / Zomato automatically"	Outbound menu sync is not available	"Swiggy and Zomato orders flow into the same kitchen screen"
"Fully integrated with your hotel PMS"	Deeper PMS sync is on the roadmap	"Charge F&B to the guest's room bill"
"AI-powered"	AI features are not live yet	Leave AI out
"Available on iPhone"	Guest and Waiter apps are Android	"Available on Android"
"Full ERP / Tally integration"	Day-book export only, not a full ERP connector	"Daily accounting export"
"100% GST compliant" / "government approved"	Unverified compliance claims	"GST-ready billing", "e-invoice readiness"
"Zero commission forever" or savings figures	Not an approved claim	"Take direct orders on your own storefront"
"Free"	All plans are paid	"Plans from ₹1,499 a month" (check current pricing)
Negative competitor comparisons	Legal and brand risk	Focus on the problem Cullinos solves
Fake reviews, invented customers or numbers	Misleading	Real testimonials with written permission only

13 · Glossary

Term	Meaning
POS	Point of Sale — the billing screen at the counter
KOT	Kitchen Order Ticket — the order slip sent to the kitchen
KDS	Kitchen Display System — a kitchen screen that replaces paper KOTs
CDS	Customer / Order Display — the "Preparing / Ready" board
QSR	Quick Service Restaurant — counter service, cafes, fast food
Cloud kitchen	A delivery-only kitchen, often running several brands
Central kitchen	One kitchen preparing food or stock for several outlets
Aggregator	Third-party delivery apps like Swiggy and Zomato
GST · CGST / SGST / IGST	India's Goods and Services Tax and its central, state, and integrated parts
GSTIN	A business's GST registration number
HSN / SAC	Tax classification codes printed on invoices
Modifier	An add-on or change to an item ("extra cheese")
Table session	An open table bill that waiter and guests can both add to
Folio · Room posting	A hotel guest's room bill · charging F&B to it
Banquet	A large event with set menus and billing
Indent	A stock request from an outlet to a central kitchen
PO / GRN	Purchase Order / Goods Receipt Note
Shift	A cashier's session, with cash counted at open and close
Deep link	A link that opens a specific restaurant in the app or web
OTP · UPI · DPDP	One-time password · India's instant payment system · India's data protection law
