USER MANUAL

How to use Cullinos

A practical guide for restaurant owners and staff — from first login to daily service, Guest app marketing, and supply chain.

Cullinos

Restaurant Operating System · by Rkyves
Owners · Managers · Cashiers · Waiters · Kitchen · 2026

START HERE

Your daily portals

Role	Open this URL	Login with
Owner / manager	https://admin.cullinos.com	Owner email from onboarding
Cashier	https://pos.cullinos.com or Admin → Portal POS	Cashier staff account
Waiter	https://Cullinos Waiter (Android)	Waiter staff account
Kitchen	https://kds.cullinos.com	Kitchen / staff login
Guests (web)	https://order.cullinos.com/*org*/*outlet*	No login required
Guests (app)	Cullinos Guest (Android)	Phone OTP / PIN
Multi-outlet	https://manage.cullinos.com	Owner (Enterprise)

Forgot password: use **/forgot-password** on Admin or ask your owner to reset staff in Admin → Staff.

1. First-time owner setup

1. ### Log in to Admin
   Open admin.cullinos.com with the owner email and password from onboarding.

2. ### Complete Setup wizard
   Choose business type (e.g. Restaurant), enter GSTIN if you have one, and finish the guided steps.

3. ### Build your menu
   Admin → **Menu**: create categories, then items with prices. Toggle availability when an item sells out.

4. ### Add tables
   Admin → **Tables**: create floor tables (e.g. T1, T2) so Waiter can take dine-in orders.

5. ### Invite staff
   Admin → **Staff**: add a Waiter and a Cashier, assign your outlet, share passwords securely.

6. ### Optional: reservations & Guest app
   Enable **Reservations** for book-links. Under **Cullinos App**, set App listing, banners, and coupons if you use the marketplace.

2. Taking orders — Waiter (dine-in)

1. ### Open Waiter
   Cullinos Waiter (Android) → log in → select outlet → see the table grid.

2. ### Open a table
   Tap a table → add menu items → confirm. Note the order number.

3. ### Optional: guest QR
   Use **Show QR to customers** so guests order on their phones into the same table ticket. End the session when the table clears.

4. ### Kitchen sees it
   KOTs appear on KDS (kds.cullinos.com) within seconds.

3. Taking orders — POS (counter / takeaway)

1. ### Open POS
   pos.cullinos.com as Cashier — or Admin → **Portal POS** (/pos) if you have POS access.

2. ### Build the cart
   Tap items, set order type (e.g. takeaway), check subtotal.

3. ### Hold if needed
   Hold an order to free the screen; resume later from the held panel.

4. ### Checkout
   Confirm the quick order. It shows in Admin → Orders and on KDS. Open/close shifts when your plan supports cash-drawer accountability.

4. Online, QR & Guest app ordering

1. Share `https://order.cullinos.com/your-org/your-outlet`, the waiter QR link, or a Guest app deep link.
2. Guest browses menu → cart → checkout with name & phone (web) or OTP/PIN (Guest app).
3. Prefer **Pay later** unless Razorpay is configured for Pay now.
4. Apply coupons where enabled; verify the order in Admin → **Orders**.

Customer login is optional on the web storefront — guests can always checkout without an account.

5. Kitchen, Order Display & Promo display

Kitchen Display

Open kds.cullinos.com (or Admin → Kitchen Display launcher). Tickets update live as orders arrive. Mark items as you cook.

Order Display

Admin → **Order Display** (/cds). Copy the public board URL to a tablet/TV so guests see Preparing → Ready.

Promo display

Admin → **Promo display**: build playlists for in-venue screens.

Reservations

Admin → **Reservations**: manage bookings; share the public book-link when enabled.

6. Back office essentials

Need to…	Go to
Change prices / 86 an item	Admin → Menu
See today’s orders	Admin → Orders
Check stock	Admin → Inventory
Add a recipe	Admin → Recipes
Create a purchase order	Admin → Purchasing / Suppliers
Central kitchen indents	Admin → Central kitchen
Schedule production	Admin → Production
Loyalty / CRM	Admin → Loyalty / Customers
Send a promo email	Admin → Promo Email
Send SMS campaign	Admin → SMS campaigns
Guest banners / push	Admin → Cullinos App
Aggregator orders	Admin → Aggregators
Delivery list	Admin → Delivery
Sales reports	Admin → Reports
Subscription / invoices	Admin → Billing
Kiosk / storefront link	Admin → Digital Ordering

Some pages (Banquets, Brands, Guests, Rooms, Central kitchen) appear only for matching business types / plans.

7. Multi-outlet (Enterprise)

1. Open manage.cullinos.com with the owner login.
2. Review network KPIs on Overview.
3. Compare outlets or create stock transfers when you have 2+ outlets.

8. Tips & good habits

- Create staff accounts per person — don’t share the owner login on the floor.

- Keep menu availability updated so guests never order sold-out items.
- End QR table sessions when guests leave so old links stop working.
- Use Incognito when testing the customer storefront as a guest.
- Never put real passwords in shared spreadsheets or chat.
- Review Guest app listing and banners before a marketing push.
